XREF QUICK REFERENCE GUIDE

HVAC ABBREVIATIONS {HV}: Click on any part abbreviation to learn its meaning (SW PRSS, etc.)

KIT: Expand KITS in {HV} by looking up <KIT 20422201> in {HV}; Click <OK>

CODES: Type <CODE FASCO 22> to look up a CODE in {XR}; Click <OK>

RULES/EXCEPTIONS:

FASCO "D158" will be as: <D-158>

EMERSON "K1009" will be as <1009>

UNIVERSAL "90" will be as: <U-90>

Letter "O" in a part/model # becomes a number "0": <M0T-1119>

Amana # D69731-009 will be as "D69731-9" (Nonessential zeros are eliminated)

GE part # "WE0017X0032" will be as "WE17X32" (Nonessential zeros are eliminated)

List of brands to be put in "AS-IS": Carrier, Lennox, Rheem, Trane, Tecumseh, Baldor & Lau

TOP navigational tools are as follows:

- **Query** (Binoculars) allows you to make a Query
- **Print** allows you to print from the MSDS database
- **Trail** (footprints/puppy paws) allows viewing of an entire query path made in an open database. Open your XREF™ database first before clicking on your <TRAIL> icon to view the queries you have made in that database; likewise, open your HVAC database first before clicking on your <TRAIL> icon to view queries you have made in that database and so forth.
- **Go Back** (single left arrow) goes to previous page in current open database
- **Go Forward** (single right arrow) goes to next page in current open database
- **Previous Hit** (double left arrow) scrolls up to your previous hit of a Query result
- **Next Hit** (double right arrow) scrolls down to your next hit of a Query result

BOTTOM navigational tools are as follows:

- **Query** (binoculars) opens up a query in your current database
- **Query Selection & Clear Query** (not applicable)
- **Query Tool** lists open database's previously made queries; find/click to access
- **Previous Hit** (large double left arrow) takes you to your previous hit of a Query result
- **Next Hit** (large double right arrow) takes you to your next hit of a Query result
- **Previous Partition Hit** (small double left arrow) scrolls up to your previous hit record
- **Next Partition Hit** (small double right arrow) scrolls down to your next hit record

QUERY tools are as follows (once you click on binoculars to open your query window):

- **<PREV>** go back in list of previously executed Queries within open database
- **<NEXT>** go forward in list of previously executed Queries within open database
- **<OK>** to view the results of your Query
- **<CANCEL>** to close out your Query window
